Note1:

- 1.The number from 14th to 16th defines the diameter of capacitor.
- 2.The 14th number is the tenth digit.
- 3.The 15th number is the single digit.
- 4.The 16th number is on the right of the floatpoint.

Note2:

- 1.The number from 17th to 19th defines the high of capacitor.
- 2.The 17th number is the hundredth digit.
- 3.The 18th number is the tenth digit.
- 4.The 19th number is the single digit.

For example :

CDA225 63V1000μF -10/+30% LL 18*35
